

IT infrastructure Project manager

 PI: Performance Improvement  Geneva, Switzerland  Professional

At ERNI we believe in the impact of Swiss Software Engineering to create customers value. Therefore we are building a global platform based on a Swiss mindset and adapted to the needs of local customers. Our clients profit from method-based consulting services, partnership-oriented technology and cost-conscious delivery services. Since the foundation in Switzerland in 1994, sharing know-how to establish collective skills and focusing on economically sound engineering solutions played a key role and are the basis for successful software projects.

Today, the ERNI Group has more than 650 employees at 15 locations in 7 countries and continues to grow.
